Notes: The Median divides the income distribution into two equal parts: one-half below and one-half above.  
Mean = Average

The Census Bureau divides Households into two types: "family" and "non-family."

Households: Both types -- family households and "non-family" households comprised of unrelated individuals or those living alone -- are included in "household" totals.

Families: Family Households are defined as two or more related individuals living together.

\*SF3 or Sample data collected from households receiving the "long form": Totals for households and families may differ from previously published Census 2000 ("100%" or "short form") data.
